| French  | A2     |

# Emilija Pejovic

## FRONTEND & ANDROID DEVELOPER

### Summary

Computer Science graduate specializing in frontend and Android development.  
Built web and mobile applications using Java, TypeScript, and Angular.  
Experienced in developing responsive, user-centered solutions and integrating REST APIs.  
Focused on writing clean, maintainable code and solving real-world problems.

### Experience

#### Web Developer

*Data Science Conference* 2024 - 2025

- Maintained and updated multiple conference websites
- Improved performance and responsiveness of web pages
- Technologies: HTML5, CSS3, JavaScript, Bootstrap

#### Ecosystem Partnerships Manager

*Data Science Conference* 2022 - 2023

- Managed partnerships with ecosystem partners
- Organized online technical tutorials and community events
- Collaborated with academic and community partners

### Projects

#### Zenlorien ([GitHub Repository](#)).

- Developed a mental health Android app using **Java** and **Android SDK**
- Integrated **SQLite** database and **REST APIs** for data handling
- Implemented user-centered features for guided psychotherapeutic exercises provided by a licensed psychotherapist

#### Volare Fly

- Developed a flight booking web application using **Angular** and **TypeScript**
- Developed dynamic UI components and implemented client-side routing
- Designed responsive layouts to improve user experience

#### Razen Travel

- Developed a travel agency web application using **Angular** and **TypeScript**
- Implemented responsive design and routing for seamless navigation
- Designed UI for presenting travel offers and destinations

### Education

#### Bachelor's Degree, Computer Science

*Singidunum University, Faculty of Informatics and Computing* 2019 - 2025

Thesis: **Zenlorien - Android Application for Maintaining Mental Health**  
Grade: **9.75 / 10.00**

Activities and Societies: Scholarship Holder, member of the Advanced Student Group, and member of the Alumni Association
